- BUY straight from creators in a secured and sleek environment

Now (Web & App)

08/2024 - 11/2024

- The marketplace for services and products where users can book services and purchase products.
- Users can connect directly with businesses through WhatsApp Business integration.
- Secure online payments powered by Tap Payments gateway.
- Businesses can manage services, products, bookings, and customer orders.
- Real-time notifications and order updates for users and businesses.
- Available on both web and mobile platforms for seamless user experience.
- User profiles, order history, and booking management features included.
- Built with React.js, React Native, Firebase, and REST API integrations.

She Who Wins

09/2024 - 02/2025

- Connect tarot card readers and customers for personalized tarot reading services.
- Customers can book recorded video readings or live tarot reading sessions.
- Seamless integration for live calling services between tarot readers and clients.
- Readers provide personalized video readings tailored to customer queries.

- Tarot readers can showcase their expertise and services with detailed profiles
- Payment gateway integration for secure and hassle-free payments.
- Real-time updates for bookings, payments, and session reminders.

Joven

02/2025 - 05/2025

- Connect users with a personalized wellness journey focused on reducing biological age.
- Users can track steps, workouts, meditation, and sleep via HealthKit
- Biological age is dynamically calculated using lifestyle metrics and user demographics.
- Firebase is used for authentication, real-time data storage, and user profile management.
- Visual health insights provided through charts, progress bars, and goal indicators.
- Personalized health goals help users stay motivated and consistent with daily habits.
- Automated push notifications remind users to stay active and follow their wellness routine.
- Secure handling of user data with Firestore rules and encrypted data communication.

Vivian Labs (Web & App)

06/2025 - 12/2025

- Developed a women's healthcare app using React Native
- Added doctor-created videos and health blogs
- Implemented live events and booking features
- Integrated In-App Purchases (IAP) for premium access
- Added push notifications and user authentication
- Optimized app performance for Android and iOS devices

Dropcrew

01/2026 - present

- Developed a sneaker marketplace app using React Native and Sharetribe
- Implemented shoe buying and selling features with secure user flows
- Integrated Stripe for payments and transaction handling
- Built product listings, user profiles, and order management features
- Added real-time chat and push notification functionality
- Optimized app performance and improved user experience across platforms

Key Skills

- React.js: Proficient in developing web applications using React.js, including state management, component-based architecture, and integration with RESTful APIs.
- React Native: Experienced in building cross-platform mobile applications using React Native, leveraging native device features and functionalities for iOS and Android platforms.
- JavaScript: Strong command of JavaScript programming language, including ES6+ features, asynchronous programming, and DOM manipulation.
- Redux: Knowledgeable in state management libraries such as Redux for maintaining application state across components.
- UI/UX Design: Familiarity with UI/UX design principles and ability to create visually appealing and user-friendly interfaces for mobile applications.
- RESTful APIs: Skilled in consuming RESTful APIs to fetch and update data in React Native applications, ensuring seamless integration with backend services.
- Debugging & Testing: Proficient in debugging and troubleshooting React Native applications using developer tools and testing frameworks like Jest or Enzyme.
- Version Control: Experience with version control systems such as Git for collaborative development and code repository management.
- Third-Party Libraries: Familiarity with integrating and utilizing third-party libraries and packages to extend the functionality of React Native applications.

- Performance Optimization: Ability to optimize the performance of React Native applications by identifying and resolving performance bottlenecks and implementing best practices.
- Agile Methodologies: Knowledge of Agile development methodologies, including Scrum or Kanban, and experience working in Agile teams to deliver high-quality software iteratively.
